Portfolio

Career Objective

Computer Science postgraduate with professional experience in AI/ML, Computer Vision, and software development. Experienced in face recognition, person tracking, medical image analysis, and multi-sensor UAV tracking. Currently an Entry Level Trainee at Softthink.co.in, focused on applying technical and problem-solving skills to innovative technology projects.

Education

Ramakrishna Mission Vidyamandira (Autonomous)
M.Sc. in Computer Science (CGPA: 8.50/10)

Belur Math, Howrah, West Bengal
August 2024 – May 2026

Government General Degree College, Singur (University of Burdwan)
B.Sc. in Computer Science (CGPA: 7.67/10)

Singur, Hooghly, West Bengal
2021 – 2024

Work Experience

Softthink Intelligent Solutions Private Limited
Entry Level Trainee Program (ELTP)

Newtown, Kolkata -700160, West Bengal, India
September 2026 – Present

- Currently undergoing professional training and gaining practical industry experience. (softthink.co.in)

FaceOff Technologies (Remote)
AI/ ML & Computer Vision Intern

Delhi, India
July 2025 – July 2026

- Developed a computer vision-based supervisor detection and person tracking system using face recognition and CCTV, with automated PDF reporting in Python. (faceoff.world)

Project on Prostate Cancer Diagnosis through Artificial Intelligence

WBP AI Cell, Kolkata

Bhavani Bhavan Police Headquarters, Alipore Police Line, Alipore, Kolkata, West Bengal -700027

Dec 2025 – April 2026

- Developed an AI-based prostate cancer diagnosis system using histopathology images in collaboration with SSKM Hospital, Kolkata. (Certificate)

Multi-Sensor Fusion System for UAV Tracking

Ramakrishna Mission Vidyamandira

Project Intern, Department of Computer Science and Electronics

August 2024 – July 2025

- Developed an EKF-based multi-sensor UAV tracking system using RF, radar, acoustic, and optical sensors, achieving 12.5 % higher tracking accuracy and published in DoSIER 2024. (ceur-ws.org)

Skills

Programming Languages: C, C++, Python

Machine Learning & Deep Learning: TensorFlow, PyTorch, Keras, Scikit-learn

Computer Vision & NLP Libraries: OpenCV, MediaPipe, YOLO, NLTK

Models & Architectures: CNN, ResNet-50, InsightFace, H-Optimus-Zero, Phikon v2

Data Science Libraries: Pandas, NumPy, Matplotlib

Web Technologies: HTML, CSS, JavaScript, React, Django

Databases: MySQL, MongoDB

Tools, Platforms & Operating Systems: Google Colab, Git, GitHub, VS Code, Pycharm, Windows, Linux

Project

B.Sc Final Year Project [2024]

Government General Degree College, Singur

DAS-STAT : A Data Repository System, Web-based System

- Developed for college faculty to streamline the management of personal, departmental, and professional data on a unified platform.
- Features include automated Excel generation and administrative controls, replacing traditional file-based management.
- Tech: SQL, Databases, HTML, CSS, JavaScript (Certificate)

Publication

Enhanced UAV Tracking through Multi-Sensor Fusion and Extended Kalman Filtering

2024

- Authors: Bodhisattwa Baidya*, Atanu Mondal, Sarbajit Manna, Gourab Das, Anirban Santra and Arkaprava Chakraborty.
- Published in ceur-ws.org(Vol-3900). (ceur-ws.org) (Paper Link)

Certifications and Workshops

- Next Generation Communication Technologies Using MATLAB Tools (organized by Indian Institute of Information Technology Una, Himachal Pradesh)
- Power of python in Data Analytics Webinar
- XAVTECH Online Talk Workshop 2024
- NPTEL Awareness Webinar
- Certificate in English Communication and Digital Literacy by Anudip Foundation (2021)
